

For Patients

Your First Visit

At your first visit to Ogren Physical Therapy you will be struck by the professional atmosphere that still creates a caring and comfortable environment.

After your paperwork is completed, you will meet one-on-one with your physical therapist and be given a thorough assessment of your injury or condition. We will then present you with a customized program of care and make recommendations for your recovery.

Under normal circumstances, your first treatment will be given that day.

Please wear loose-fitting, comfortable clothing that will allow the physical therapist to examine the injured area.

Also bring with you a list of any prescribed medicines you are currently taking as well as over-the-counter medications you take regularly.
